- Spanish ethnicities
- Lived in Ohio, New York City area, Four Corners area, and SW Florida

Professional Vision:

I have a successful private practice with access to numerous networks and populations. I use high quality, valid clinical tools such as depth psychology, cognitive/behavioral methods, Buddhist meditations, hypnosis and dream interpretation. I have avenues to publish articles and books through my powerful mentors. I have a presence in Jungian and twin circles. I am improving psychotherapy for twins whose life experiences and developmental stages are treated as unique. I provide quality psychotherapy to trauma survivors who suffer from depression, isolation, alcohol and drug abuse. I respond to disaster sites; my compassion leads me to the heart of suffering where I hope to bring peace. I practice in at least three States and overseas, maintaining my licenses and marketing//billing/professional relationships accordingly. My on-line presence is supported by numerous web sites, two radio programs (Twin Talk on World Talk Radio with 5000 listeners per month and Seeking Serenity on Matrix Media), e-books and articles, a product line of CDs. I coordinate and co-locate with medical doctors, psychologists, lawyers, doctors of oriental medicine, and spiritual schools. I work to improve the wholeness and wellness of my communities and expand my practice to meet the emergent needs
